

#### Quem somos?

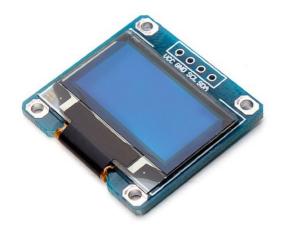

# Descrição do sistema

Fonte: Agostinho L. S. Castro

#### Componentes Base:

- 1. Arduino Uno
- 2. Sensor de Presença (PIR)
- 3. Display OLED 128x64 com Interface I2C
- 4. Modulo RTC (Real Time Clock) DS1307
- 5. Micro Servo Moto

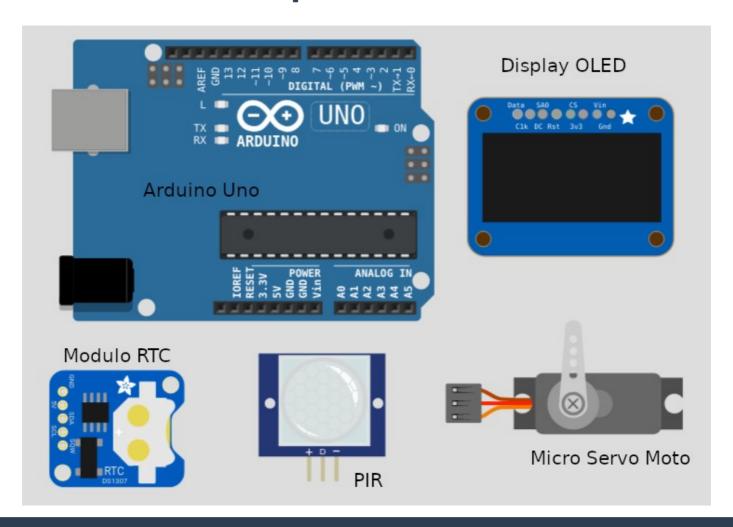

Vcc OUT GND

#### Custo Aproximado:

COMPONENTES	QUANTIDADE	PREÇO UNITÁRIO
Arduino UNO	2	R\$ 40,00
Módulo RTC	2	R\$ 25,00
Micro Servo Motor	2	R\$ 20,00
Display OLED	2	R\$ 40,00
Sensor PIR	2	R\$ 13,00
TOTAL APROXIMADO	-	R\$ 276,00

Simulador: Wokwi (https://wokwi.com/)

#### Bibliotecas:

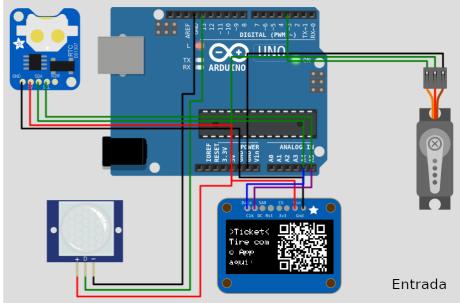

- 1. Para Gerar o Qr code: <u>grcode</u> (Autor: Richard Moore)
- 2. Para usar o Display OLED: <u>Adafruit\_SSD1306</u> (Autor: Adafruit)
- 3. Para usar o Módulo RTC: RTClib (Autor: Adafruit)
